DETAILED ACTION

1. Upon further consideration, the allowable subject matter of claims 12, 13, 21 and 22 are withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-22, 40-49, 51, 53 and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sederberg et al. (5,992,023), hereinafter Sederberg.

Sederberg teaches a metal demolition shears comprising a fixed jaw 14 having a fixed blade 66 with a first cutting/shearing edge, a movable jaw 16 having a second cutting/shearing edge (formed by blade 116) and a wear plate/piercing tip insert 140 having one cutting tip 144. See Figs. 1-14.

Sederberg fails to teach the geometric configuration of the wear plate/pierce tip being the same in a first position and a second position, wherein the second position is a position in which the wear plate/tip insert is rotated 180 degrees.

Sederberg teaches the geometric configuration of the cutting tip of the blade 116 being the same in the first position and the second position. See Fig. 13 and 14.

Therefore, it would have been obvious to one skilled in the art to provide the wear

plate/pierce tip 140 the geometric configuration as taught in the blade 116 (which is to have two cutting tips) so that both ends of the wear plate/pierce tip can be used to reduce the spare part of the wear plate/pierce tip.
